**Subject:** Haskell Lake meetings

All: On 27 April, we re-established regular discussions with WDNR and other parties, regarding the cleanup at Haskell Lake. The free exchanges of these meetings are moving the project forward, especially as the sharing of information outside the group sessions has become more common, but the Tribe and EPA might still want to have their own conversations to address either technical planning or management concerns. LDF and EPA had a private tech call recently, to share thoughts in between the LDF-EPA-WDNR discussions. There were also exchanges last week about possible managers' meetings to look at broader issues that have come up in the overall planning process. Following the pattern of our technical interactions, manager-level meetings could first be LDF-EPA, and then LDF-EPA-WDNR.

The Tribe has proposed talking prior to the 5 July meeting with WDNR. Proposed topics include: 1) monitoring well network plan and implementation; 2) communication; 3) status of requested EPA information; 4) status of 3rd facilitated EPA-Tribe tech meeting; and 5) interim action planning. These are all important topics. I suggest, for now, maintaining the separation of communication/cooperation issues from the more technical content of staff meetings. Doing one kind of thing at a time makes it easier to get the right people involved and make real progress.

Since time is very tight, it will be helpful to schedule these connections on a regular basis, rather than waiting for specific items to arise and then working the schedule. Well-defined agendas will support cooperative decision-making. As we go forward, please keep me informed on schedules and likely attendees for any meetings you arrange. Thanks.

**Subject:** RE: tech meeting notes, 09 June 2017- EPA-Tribe monitoring well network plan call in advance of state tech call

Good Morning,

During the June 22<sup>nd</sup> EPA-State- State contractor-Tribe Call, the State confirmed wells not accepted for PECFA funding consideration and proposed a new VAS scope of work for the remaining locations that would result in either a) no well, b) moved well, or c) same location with informed well screening.

A EPA-Tribe call is needed in advance of the scheduled July 6 EPA-State-State Contractor-Tribe call.

The availability of Tribal Staff for the EPA-Tribe call is:

June 27: 8 am – 10am and 1pm- 3pm

June 30: 8am – 11am

Agenda Topics:

Monitoring well network plan and implementation

Communication

Status of Requested EPA information

Status of 3<sup>rd</sup> facilitated EPA-Tribe tech meeting

Interim Action Planning

Sincerely,

Kristen Hanson

Environmental Response Program Coordinator
